Experience

Director of Digital Experience 2022 - present

Imperial Brands - www.imperialbrandspc.com

- Built NGP Digital's in-house design function from scratch — hiring, growing, mentoring and challenging an interdisciplinary UX/UI team working alongside external design partners.
- Architected and own the governance of Breeze — a token-driven, multi-brand white-label design system across blu, Pulze and Zone, where a full rebrand propagates through token updates alone.
- Established and scaled design processes, tooling and governance across the NGP pillar, driving efficiency and velocity internally and with external partners.
- Advocate for design thinking and design linking across the pillar — aligning design activity to the digital delivery roadmap with Delivery Managers, Product Owners and Engineers.
- Lead interdisciplinary teams through the research and design process to produce work that materially impacts partners and customers, supporting localisation across multiple markets via the CMS.

Experience Design Lead 2020 - 2021

Auto Trader UK - www.autotrader.co.uk

- As strategist — led discovery for the new Digital Retailing offer, reframing it from a transaction problem to a trust problem and defining the pain points and gains for both retailers and customers.
 - As line manager & mentor — 3 product designers reporting directly, plus 7 others led to deliver their best work and grow their careers.
 - As designer — delivered designs and specifications across the funnel: Part-Exchange, Finance and Reservation.
 - Shipped the Digital Retailing MVP, now piloting across retailers in the Auto Trader ecosystem.
- During the initiative, consumer appeal for digital car-buying rose 61% → 72% across 5,000 respondents.

Experience Design Lead 2018 - 2020

Booking.com - www.booking.com

- Steered discovery/explore and experimentation strategy, influencing stakeholders to deliver customer-focused E2E experiences that increased convenience, brand loyalty and engagement.
- Line-managed 3 UX designers to define and deliver solutions across the Ground Transport business.
- Defined epics, user stories, prioritisation and backlog refinement with product and engineering leads.
- Shaped C-level design initiatives — design systems, processes & tooling, onboarding and recruitment.

Principal Product Designer 2017 - 2018

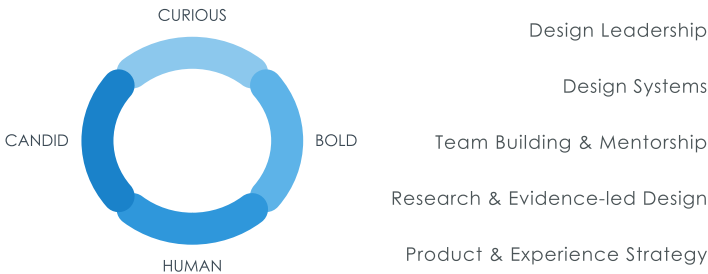

Intuit France - www.quickbooks.fr

- Led cross-functional design studios using deep customer empathy to surface the financial pain points — professional and personal — that cost users time, money and confidence.
- Drove broad-to-narrow ideation and rapid prototyping across core workflows (invoicing, expenses, financial reports, taxes), grounded in field research and behavioural data.
- Ran rapid customer experimentation, pressure-testing designs and assumptions and failing fast to meet both user expectations and local law.
- Shipped regulated-fintech experiences: Invoicing, Effortless Expenses, Making Tax Digital (UK), GDPR, VAT Anti-Fraud (France) and automated company setup via public APIs.

Key Skills

Creative, collaborative and efficient

- Customer-driven innovation through an outside-in approach to user-centered design and design-thinking methodology — driving ideation toward the best solutions to customers' hardest problems.
- Fail-fast, lean-UX practice grounded in field research, usability testing and interaction design — monitoring, measuring and optimising workflows and validating assumptions with evidence.
- Aligns product roadmaps to business objectives across local and central teams, producing seamless E2E experiences that strengthen global brand strategy and standards.
- Defines OKR/KPI metrics with product leaders, increasing visibility of UX/CX contribution to acquisition, retention, active usage and conversion.

Knowledge

20+ years of arts, design, and technology

- Industry UI/UX principles with current web technologies — efficient, engaging E2E experiences that are usable, useful and desirable.
- International production experience — localised solutions and content for regional BUs; bold vision and strategy across the ecosystem.
- Strong organisational and communication skills in highly fluctuating environments.
- Mentoring of designers, agencies and contractors; relationship-building and strategic partnerships.

Education

Bachelor of Science in Computer Sciences 2004 - 2006
California State University Chico
Minor: Communication Design

Interaction Design Foundation 2018 - 2022
The Interaction Design Foundation
20 certificates: HCI, UX research, psychology, design strategy
